NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS For the Three and Nine Months Ended September 30, 2021 and 2020

(All dollar amounts expressed in thousands of United States dollars, unless otherwise noted)

1 Nature of Operations

Nature of operations

Elevation Gold Mining Corporation (the "Company") is incorporated under the laws of the province of British Columbia, Canada and its principal business activity is the exploration, development and production of precious metals. The address of the Company's registered office is Suite 1920 – 1188 West Georgia Street, Vancouver, British Columbia, Canada. The Company's common shares are listed on the Toronto Stock Venture Exchange in Canada under the ticker symbol ELVT and on the NASDAQ OTC in the United States under the ticker symbol EVGDF.

The Company's primary operation is the open pit Moss Gold-Silver mine (the "Moss Mine") located in Mohave County, Arizona, as well as the Hercules Project ("Hercules"), an exploration property located in Lyon County, Nevada.

Going concern

These consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. There are conditions and events, which constitute material uncertainties that may cast significant doubt on the validity of this assumption.

Ongoing operations and capital expenditures of the Moss Mine are dependent on the Company's ability to generate sufficient cash flow from production, which are subject to commodity price risk from fluctuations in the market prices for gold and silver. To continue operations at the Moss Mine, the Company will require additional financing. While the Company has been successful at raising funds in the past, there can be no assurance that it will be able to do so in the future.

These condensed interim consolidated financial statements do not reflect any adjustments, which may be material, to the carrying values of assets and liabilities, which may be required should the Company be unable to continue as a going concern.

Impact of Covid-19

The global response to the COVID-19 pandemic has resulted in, among other things, border closures, severe travel restrictions, as well as quarantine, self-isolation, and other emergency measures imposed by various governments. Additional government or regulatory actions or inactions around the world in jurisdictions where the Company operates may also have potentially significant economic and social impacts. The COVID-19 virus and efforts to contain it may have a significant effect on commodity prices, and the possibility of a prolonged global economic downturn may further impact commodity demand and prices. If the Company's business operations are disrupted or suspended as a result of these or other measures, it may have a material adverse effect on the Company's business, results of operations and financial performance. Factors that may be impacted, among other things, are the Company's operating plan, production, supply chain, construction, and maintenance activities. The Company continues to monitor the situation closely, including any potential impact on its operations. The extent to which COVID-19 may impact the Company's business and operations will depend on future developments that are highly uncertain and cannot be accurately estimated, at this time, including new information which may emerge concerning the severity of and the actions required to contain COVID-19 or remedy its impact.

2 Statement of compliance

These condensed interim consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards applicable to the preparation of interim financial statements, including International Accounting Standards 34, Interim Financial Reporting as issued by the International Accounting Standards Board.

These condensed interim consolidated financial statements were approved and authorized for issue by the Board of Directors of the Company on November 26, 2021.

Change of year-end

During the six months ended December 31, 2020, the Company approved a change of its year end from June 30th to December 31st. The Company's transition period was the six months ended December 31, 2020. The comparative periods are the three and nine months ended September 30, 2020.

3 Significant accounting policies

The significant accounting policies applied in the preparation of these condensed interim consolidated financial statements are consistent with the accounting policies disclosed in note 3 of the audited consolidated financial statements for the six months ended December 31, 2020. These condensed interim consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements for the six months ended December 31, 2020.

Basis of consolidation

Subsidiaries

Subsidiaries are all entities over which the Company has control. Subsidiaries are fully consolidated from the date on which control is transferred to the Company until the date on which control ceases. These condensed interim consolidated financial statements include the accounts of five wholly-owned subsidiaries, Golden Vertex Corp., Golden Vertex (Idaho) Corp., Eclipse Gold Mining Corp., Alcmene Mining Inc. and Hercules Gold USA, LLC. All intercompany balances, and gains or losses on intercompany transactions, have been eliminated for consolidation purposes.

Acquisition accounting

The Company accounted for the acquisition of Eclipse Gold Mining Corp. ("Eclipse") as an asset acquisition. Significant judgement and estimates were required to determine that the application of this accounting treatment was appropriate for the transaction. These included, among others, the determination that Eclipse was not considered a business under IFRS 3 – *Business Combinations* as Eclipse did not have significant inputs, processes and outputs, that together constitute a business.

Changes in significant accounting policies

The Company adopted Interest Rate Benchmark Reform - Phase 2: Amendments to IFRS 9, IAS 39, IFRS 4 and IFRS 16 (the "Phase 2 Amendments") effective on January 1, 2021. Interest rate benchmark reform ("Reform") refers to a global reform of interest rate benchmarks, which includes the replacement of some interbank offered rates with alternative benchmark rates.

(Unaudited)

3 Significant accounting policies (continued)

The Phase 2 Amendments provide a practical expedient requiring the effective interest rate to be adjusted when accounting for changes in the basis for determining the contractual cash flows of financial assets and liabilities that relate directly to the Reform rather than applying modification accounting which might have resulted in a gain or loss. In addition, the Phase 2 Amendments require disclosures to assist users in understanding the effect of the Reform on the Company's financial instruments and risk management strategy. The Company's Master Lease Agreement as defined in Note 9 is indexed to London interbank offered rates ("LIBOR") that have not yet transitioned to alternative benchmark rates at the end of the current reporting period.

4 Acquisition of Eclipse Gold Mining Corp.

On February 12, 2021 (the "Closing"), the Company acquired Eclipse in exchange for 18,160,021 common shares of the Company with a fair value of \$39,432.

The acquisition was accounted for as an asset acquisition. The total consideration was allocated to the assets and liabilities acquired based on their fair values:

Depletable mineral properties consist of the Moss Mine. Non-depletable mineral properties consist of exploration on the Moss Property, the Silver Creek Property and the Hercules Property, which are separate from the Moss Mine.

Moss Mine Property – Mohave County, Arizona

The Company owns 100% of the Moss Mine and has royalty agreements with various parties whereby the Company pays net smelter returns ("NSR") royalties totalling approximately 6% to various royalty holders - ranging from 1% to 3% on certain patented and unpatented claims related to the Moss Mine.

In addition, a royalty of up to \$15 per troy ounce of gold produced and up to \$0.35 per troy ounce of silver produced is payable to a non-related party.

6 Mineral properties, plant and equipment (continued)

Silver Creek Property – Mohave County, Arizona

On May 7, 2014, and amended June 28, 2017 and August 2, 2019 the Company secured an option on the Silver Creek property, located adjacent to the Moss Mine from La Cuesta International, Inc. ("LCI"). To fulfill the terms of the 35 year mineral lease and option agreement, the Company paid LCI \$5 and issued 100,000 common shares of the Company upon execution of the agreement and had certain exploration expenditure requirements. Details are as follows:

- i. Pay LCI \$10 cash (paid) and fund a minimum of \$15 (completed) on work commitments by May 7, 2015;
- ii. Pay LCI \$20 cash (paid) and fund a minimum of \$20 (completed) on work commitments by May 7, 2016;
- iii. Pay LCI \$30 cash (paid) by May 7, 2017 and \$20 cash (paid) by July 28, 2017;
- iv. Pay LCI \$45 cash by May 7, 2018 (paid);
- v. Pay LCI \$50 cash (paid) by May 7, 2019 and fund a minimum of \$68 on work commitments by May 7, 2019 (completed); and
- vi. Pay LCI \$25 cash every six months, thereafter (paid to date).

The agreement provides for a production royalty of 1.5% NSR on claims owned 100% by LCI and 0.5% NSR on third party claims within the claim block. To acquire the claims, the Company is required to make payments to LCI totalling \$4,000 in any combination of aggregate royalty payments and lump-sum payments at its sole discretion. All payments other than the work commitments are credited against the royalty, including amounts paid to date. Once \$4,000 has been paid, the NSR rates, on claims not otherwise acquired, reduce by 50%.

Hercules Property – Lyon County, Nevada

On August 9, 2019, Hercules Gold entered into an agreement with Great Basin Resources, Inc and Iconic Minerals Ltd. for an option to obtain 100% interest in the Hercules Project, comprising certain unpatented mining claims. The option agreement has a maximum term of twelve years from February 18, 2020. Subsequent to the acquisition of Eclipse, the parties entered into an amending agreement dated February 12, 2021. Per the terms of the agreement the Company issued 181,666 common shares to Iconic Minerals Ltd. in February 2021 and will issue a further 181,666 common shares on the first and second anniversary of the first issuance. The Company will also make annual payments of \$50 to Great Basin Resources, Inc up to an aggregate of \$600, which began in February 2021. Additionally, the Company is subject to a work commitment of \$2,300 over the first three years of the agreement. The Company is in compliance with all terms of the agreement.

(i) Convertible debenture - 2020

In June 2020, the Company issued a notice of redemption in respect of the 2016 CAD\$6,700 subordinated unsecured convertible debentures, with holders of the debentures being given the opportunity to subscribe for new subordinated unsecured CAD\$6,710 worth of 2020 convertible debentures. The 2020 debentures mature on June 30, 2025, bear interest at 5% per annum, payable on June 30 and December 31 of each year while outstanding, which interest, subject to regulatory approval, may at the option of the Company be settled in common shares. The principal amount of the 2020 debentures is convertible into common shares of the Company at the price of CAD\$2.40 per share. The Company may redeem the 2020 debentures in cash on or after July 31, 2022, in whole or in part from time to time, upon required prior notice at a redemption price equal to their principal amount plus accrued and unpaid interest, if any, provided that the trading price of the common shares for the 20 consecutive trading days ending five trading days prior to the date of the redemption notice must be less than the conversion price. Additionally, on or after July 31, 2022, the Company has the option to repay the principal amount of the 2020 debentures in common shares, provided certain circumstances are met including but not limited to; no default has occurred and is continuing at such time, and the trading price of the common shares for the 20 consecutive trading days ending five trading days prior to the date of the redemption notice or maturity date (as the case may be) is at least 150% of the conversion price.

The convertible debenture 2020 contains an embedded derivative (the "Conversion Component") relating to the conversion option and a conversion price fixed in CAD. The Conversion Component's fair value as at September 30, 2021 was estimated to be \$2,013 using the Black Scholes option-pricing model (Note 12).

9 Leases

During the year ended June 30, 2018, the Company executed a definitive Master Lease Agreement (the "MLA") for up to \$9,000 of equipment purchases. The significant terms and conditions of the MLA include: a maximum of \$9,000 available to fund equipment purchases with 10% to 30% due as advance payments at lease commencement, fixed quarterly payments over a four year lease period, interest rate of 3-month USD LIBOR plus additional interest rates ranging from 5.00% to 6.25% per annum and the right to buy the equipment at the end of the lease period for nominal consideration. The MLA is secured with the acquired assets in favour of the lender and a guarantee from the Company.

Minimum lease payments and present value of lease obligations is as follows:

10 Silver stream

During the year ended June 30, 2019, the Company entered into a \$20,000 silver streaming transaction with an effective date of October 1, 2018. Under the terms of the agreement the Company will deliver 100% of payable silver into the agreement until 3.5 million ounces are delivered, thereafter, 50% of payable ounces will be supplied into the agreement over the life of the mine on a monthly basis. As at September 30, 2021 827,676 ounces of silver have been credited against the agreement.

Deliveries are subject to a ratio of silver to actual gold produced whereby, in the event the ratio is not met, the Company would be required to purchase and deliver silver ounces required to achieve the ratio. The silver stream is secured with a first charge over assets.

The Company receives 20% of the five-day average spot silver price at the time each ounce of silver is delivered. The Company recognizes silver revenue for silver ounces delivered under the arrangement at the spot price at the time of delivery. The silver advance is reduced by silver ounces delivered at the forward spot price at the inception of the agreement, offset by the financial liability's accretion over the life of the mine.

10 Silver stream (continued)

The silver stream has been accounted for as a financial liability with an embedded derivative which relates to changes in silver price and expected production. The financial liability is measured at amortized cost. The embedded derivative is recorded at fair value each reporting period with changes reflected in the condensed interim consolidated statements of income (loss) and comprehensive income (loss). At September 30, 2021, the fair value of the embedded derivative was \$16,919 (Note 12).

The Company's provision for reclamation relates to the environmental restoration and closure costs associated with the Moss Mine. The provision has been recorded at its net present value using a discount rate of 1.32% and a long-term inflation rate of 2%, with expenditures anticipated over a ten year period beginning in 2028. The provision is remeasured at each reporting date based on land disturbance. Accretion expense is recognized in the condensed interim consolidated statements of income (loss) and comprehensive income (loss). The total undiscounted amount of the Company's estimated obligation, based on land disturbances at the Moss Mine as of September 30, 2021, was \$2,982.

12 Derivatives (continued)

(i) Warrants:

The Company's functional currency is the USD. As the exercise price of the Company's share purchase warrants is fixed in CAD, a variable amount of cash in the Company's functional currency will be received on warrant exercise. Accordingly, these share purchase warrants are classified and accounted for as derivatives at fair value through profit or loss. The fair value of warrants issued are valued using their market price on the Toronto Stock Exchange, or where a market price is not available, the Black-Scholes option-pricing model. The warrants have exercise prices ranging between C\$0.40 to C\$0.80 with remaining lives of 1.3 to 1.4 years. Holders are entitled to receive one common share of the Company for every six warrants.

The following assumptions were used for the Black-Scholes valuation of warrants:

	September 30, 2021	December 31, 2020
Risk-free interest rate	0.53%	0.20%
Expected life of warrants	1.3-1.4 years	2.2 years

Current portion of warrant derivative	(1,546)	(2,087)
Non-current portion of warrant derivative	\$ -	\$ -

(ii) Silver stream embedded derivative:

The silver stream embedded derivative is valued using a Monte Carlo simulation valuation model. The key inputs used by the Monte Carlo simulation are the silver forward curve price, long-term silver production volatility, the risk-free interest rate and the Company's credit spread.

The valuation of the silver stream embedded derivative also required estimation of the Company's anticipated production schedule of silver ounces delivered over the life of mine.

(iv) Conversion component of 2020 convertible debenture:

The 2020 convertible debenture (Note 8) is deemed to contain an embedded derivative (the "Conversion Component") relating to the conversion option and a conversion price fixed in CAD. The Conversion Component's fair value was estimated using the Black Scholes option-pricing model and volatility. Fair value gains and losses at each reporting period are recorded in the condensed interim consolidated statements of income (loss) and comprehensive income (loss).

The following assumptions were used for the Black-Scholes valuation of the Conversion Component:

	September 30, 2021	December 31, 2020
Risk-free interest rate	1.11%	0.25%
Expected life	3.8 years	4.8 years

13 Share capital, share option reserve and warrant reserve

a) Share capital

Authorized share capital consists of an unlimited number of common shares without par value.

On September 24, 2021 the Company completed a consolidation of the issued and outstanding common shares on the basis of one post-consolidation Common Share for every six pre-consolidation Common Shares. The common shares of the Company commenced trading on the TSX Venture Exchange on a post-consolidation basis on September 24, 2021. The Company's new trading symbol is ELVT. The exercise or conversion price and the number of shares issuable under the Company's outstanding stock options and convertible instruments were proportionately adjusted upon completion of the Consolidation. All information relating to earnings/loss per share, issued and outstanding common shares, share options and warrants, and per share amounts in these financial statements have been adjusted retrospectively to reflect the share consolidation.

b) Shared-based compensation

The Company has adopted an incentive stock option plan under the rules of the TSX Venture Exchange ("TSXV") pursuant to which it is authorized to grant options to employees, consultants, directors and officers, enabling them to acquire up to 10% of the issued and outstanding common shares of the Company. Under the plan, the exercise price of each option is equal to the market price of the Company's shares on the date of grant. The options can be granted for a maximum term of 10 years with vesting terms determined by the Board of Directors. No individual may be granted options exceeding 5% of the Company's common shares outstanding in any 12-month period.

d) Share unit plan

The Company has a share unit plan whereby Restricted Share Units (RSUs) and Performance Share Units (PSUs) may be granted to employees, consultants, directors and officers of the Company. The current maximum number of share units authorized for issue under the share unit plan is 1,000,000. Once vested, at the option of the Company, each share unit entitles the participant to receive one common share of the Company at the end of a specified period or a right to receive an amount of cash equal to the market value of the vested share unit on the payment date.

Currently, the Company has granted RSUs. Equity-settled RSUs are recognized over the vesting period from the date of grant. Cash-settled RSUs are marked to market and recognised as a liability on the Condensed Interim Consolidated Statements of Financial Position. Continuity of the Company's RSUs issued and outstanding is as follows:

	September 30, 2021	December 31, 2020
Outstanding, beginning of period	249,999	499,998
Granted	72,665	-

The weighted average remaining life of the outstanding warrants as at September 30, 2021 was 1.3 years (2020: 1.8 years).

f) Earnings (loss) per share

The calculation of diluted earnings (loss) per share was based on earnings (loss) attributable to ordinary shareholders and the weighted average number of shares outstanding after adjustments for the effect of potential dilutive shares. For the three months ended September 30, 2021, potentially dilutive shares associated with share options and warrants out of the money were not included in the diluted earnings per share calculation as their effect was anti-dilutive. For the nine months ended September 30, 2021, potentially dilutive shares associated with the convertible debentures, share options and warrants out of the money were not included in the diluted earnings per share calculation as their effect was anti-dilutive.

The following table summarizes the calculation of basic and diluted earnings per share:

22 Fair value measurements and financial risk management

The carrying values of cash, trade and other receivables, and trade and other payables approximate their fair values due to the short-term nature of these instruments.

In evaluating fair value information, considerable judgment is required to interpret the market data used to develop the estimates. The use of different market assumptions and different valuation techniques may have a material effect on the estimated fair value amounts. Accordingly, the estimates of fair value presented herein may not be indicative of the amounts that could be realized in a current market exchange.

The Company classifies its financial instruments measured at fair value at one of three levels according to the relative reliability of the inputs used to estimate the fair value in the fair value hierarchy.

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly.

Level 3 – Inputs that are not based on observable market data. The Company has no financial instruments classified in Level 3.

The following tables present the carrying amounts and fair values of the Company's financial assets and liabilities, including their levels within the fair value hierarchy. Fair value information for financial assets and financial liabilities not measured at fair value is not presented if the carrying amount is a reasonable approximation of fair value.

22 Fair value measurements and financial risk management (continued)

The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls and to monitor risks and adherence to market conditions and the Company's activities. The Company has exposure to credit risk, liquidity risk and market risk as a result of its use of financial instruments.

This note presents information about the Company's exposure to each of the above risks and the Company's objectives, policies and processes for measuring and managing these risks. Further quantitative disclosures are included throughout the condensed interim consolidated financial statements. The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Board of Directors has implemented and monitors compliance with risk management policies.

(a) Credit risk

Credit risk is the risk of financial loss to the Company if a client or counterparty to a financial instrument fails to meet its contractual obligations. The Company has credit risk in respect of its cash, trade and other receivables, and restricted cash. The Company considers the risk of loss relating to cash and restricted cash to be low because these instruments are held only with a Canadian Schedule I financial institution, a US-chartered commercial bank and a US government agency. Trade and other receivables at September 30, 2021 related primarily to gold and silver dore sales and goods and services tax which is expected to be collectible in full due to the nature of the counterparties and previous history of collectability.

(b) Liquidity risk

Liquidity risk is the risk that the Company will incur difficulties meeting its financial obligations as they are due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions without incurring unacceptable losses or risking harm to the Company's reputation. Refer to Note 1 for the Company's statement on going concern.

The Company manages its liquidity risk through the preparation of budgets and forecasts, which are regularly monitored and updated as management considers necessary and through the Company's capital management activities. A summary of contractual maturities of financial liabilities is included in Note 23.

(c) Market risk

Market risk consists of currency risk, commodity price risk and interest rate risk. The objective of market risk management is to manage and control market risk exposures within acceptable limits while maximizing returns.

(i) Currency risk

Foreign currency exchange rate risk is the risk that the fair values or future cash flows of the Company's financial instruments will fluctuate as a result of changes in foreign exchange rates. Some of the Company's operating and corporate administration expenditures are incurred in Canadian dollars and the fluctuation of the CAD in relation to US\$ will have an impact on the Company's profitability and the Company's financial assets and liabilities. The Company has assessed the impact to be low. At September 30, 2021 the Company held cash denominated in USD of \$1,112 and CAD of \$244 (December 31, 2020: USD4,955 and CAD4,241). With other variables unchanged, a 1% increase on the USD/CAD exchange rate would increase debt by \$34. The Company has not entered into any formal arrangements to hedge currency risk but does maintain cash balances within each currency.

22 Fair value measurements and financial risk management (continued)

(ii) Commodity price risk

The Company is subject to commodity price risk from fluctuations in the market prices for gold and silver. Commodity price risks are affected by many factors that are outside the Company's control including global or regional consumption patterns, the supply of and demand for metals, speculative activities, the availability and costs of metal substitutes, inflation and political and economic conditions.

The value of the silver stream embedded derivative will fluctuate with changes in the price of silver which will affect future earnings. Management closely monitors trends in commodity prices of gold and other precious and base metals as part of its routine activities, as these trends could significantly impact future cash flows.

(iii) Interest rate risk

Interest rate risk is the risk that the fair values or future cash flows of the Company's financial instruments will fluctuate as a result of changes in market interest rates. Interest rate risk arises from the interest rate impact on cash, which is held at variable market rates, and is exposed to interest rate risk on its outstanding borrowings. With other variables unchanged, a 1% increase on the Company's floating rate debt would increase annual interest expense by \$27. The Company closely monitors its exposure to interest rate risk and has not entered into any derivative contracts to manage this risk.

23 Commitments

At September 30, 2021, the Company had the following contractual obligations outstanding:

	Within 1 year	2-3 years	4-5 years	5+ years	Total
